Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments have been considered, but are not persuasive. Therefore, the 35 U.S.C - 103 rejection is maintained as set forth on the Final Office Action dated on 7/26/2006. See Examiner Responses below:

1. Applicant argues prior art fail to teach, " providing candidate data representing attributes of candidates for the task [item] responsible person including field of expertise".

Examiner respectfully disagrees. Referring to Day - column 7, lines 19-25, wherein the reviews section allows the team members entering the document information to identify the additional team members who will be responsible for the review of the document, wherein the actual reviewer(s) is selected from a list of potential reviewers that is restricted to particular team members of management which ensures that documents are not widely disseminated without having first been reviewed by an authorized team member or management which is equivalent to task responsible person, wherein document is interpreted to be the [item]; column 9, lines 59-66, wherein the basic information section, a team member designation section and additional information, wherein the team member designation section permits entering information associated with the team members including user identification by which the user is identified in the global directory, also see Figure 13, diagram 224, wherein the first and last name, representative of, role, database identification numbers, and wherein diagram 220 illustrates a new template which is only used by team leaders and administrators who are given access to additional links beyond those links available for general team members, wherein one such link permits the team leader to configure the team room using the new team room template which is divided into basic information, team member designation, and additional information section; and as defined in applicants specification, paragraphs [0022-0023], the data representing attributes of candidates for task-responsible persons can comprise their names, expertise, workload, and contact information and at least one task is assigned to at least one task-responsible person, in some embodiments, an assignment is made after taking into consideration the workload and the expertise of individuals, wherein for example, the North America marketing is assigned to John Smith, and also shown in Figure 13, within diagram 224, illustrates a team member, representative of, and role, wherein role is assigned to a member.

2. Applicant argues prior art fails to teach, "read-only access to a task or item report"

Examiner respectfully disagrees. Referring to Day - column 5, lines 19-26, wherein virtual team room environments are accessed through the unsecured network 16 or the secured network 20 or other networking architecture, and facilitate the sharing of information and the linking of data for diverse groups of users, wherein each team member is given access to a virtual team room environment supporting the project or sub-project associated with that team and that the team member is involved with; column 5, lines 31-34, wherein restricted access may be provided such that only team members management and other authorized users may access, modify, add or delete project information and data retained within a team room and lines 37-41, wherein restricted level access to only those team members or users having a profile within the local directory 28 ensures the integrity of the information and data, as these users will be the only users with authority to enter or edit information and data within the virtual team room environment which is equivalent to read-only access.

3. Applicant argues prior art fails to teach, namely a "patent opinion" as indicated on pages 8 & 9, of applicant remarks.

Examiner respectfully disagrees. Referring to Uchio - Figure 32, diagram 3207, wherein the reference numeral 3207 denotes comments of the studying persons in the development section and the development right acquirement support section, further defined in paragraph [0211], wherein reference numeral denotes the case number of the present case, summary of present case, type of action, and so forth; and paragraph [0103], also indicates the comment to the next person, wherein comment is equivalent to an opinion.

4. Applicant argues prior art fails to teach, " claim 39, wherein patent opinion concerns whether a specific patent is infringed by a competitor of a user of the system, as disclosed within applicant remarks on page 10, with emphasizes on the term "infringe".

Examiner respectfully disagrees. Referring to Uchio - see Figure 32, wherein it illustrates the results of a case; paragraphs [0203], [0205], and [0211], wherein reference numeral denotes an approval stamp, wherein infringed is interpreted to be the right to exclude others from utilizing an invention.

#### Additional Examiner Remarks:

Page 4, within applicant's remarks, states: "Why priority feature of Day is allegedly equivalent to candidate workload feature". Examiner clarifies the equivalence, refer to column 8, lines 7-11, wherein the basic information section includes priority selection, wherein the priority is color coded with red corresponding to high, yellow corresponding to medium and green corresponding to low, and wherein its inheritance that priority indicates precedence, especially established by order of importance or urgency; column 8, lines 18-18, wherein a due date for the review may be assigned, which is also equivalent to workload, wherein workload is defined to be the amount of work OR expected from a person in a specified time.

Also, on page 4, within applicants remarks, states" :Why the "new team template" featured in Figure 13 is equivalent to candidate contact information. Please see above (number 1), for clarity and equivalence in regards to this matter.
